

A Web Application which returns land property search information on one or more Croydon Street Property Addresses

This Application Map made with Scapple, super simple to use and available 30 days free trial download.

User Chooses How many Property Addresses they want to Search

For each property, enters any part of a Street name (for speed), with or without house name or number

Gives any part of zero to three side street names

We check this against a MongoDB Croydon Street Info Database

We return List of possible Main Street and Side Street Names

Repeat Process for next property

No

Is this the last property to be searched?

Yes

User makes selection

We return one PDF or similar Street Report for each of the streets searched.

We save the report and user details in Database
